OK Al, et. al - y'all are gonna think I'm making this up

3 & 4 yrs ago I had a 3-footer on a 500W xfmr. And a live mic amp'd thru same speaker.

You cud hear the Snaaaaarl111 - putz, Snaaaaarl111 - putz,
at least 4 houses away.

And someone called the power company.

These guys were spotlighting the power poles & never thot to look @ ground level.

I let 'em pass a couple of times then unplugged the thing. At least for a while.

Incident's gone down in the great log of unsolved utility mysteries which

is soon to be another direct-link TV channel. Oughta be right up there with the euthanasia channel

Subject: "Spy Radio" Event
Mime-Version: 1.0
Content-Type: text/plain; charset=us-ascii
Content-Transfer-Encoding: 7bit

There will be a spy radio event of sorts tomorrow, Saturday, 1 November.

o Organized by Dennis, W7QHO, the event is actually for military field radios including spy radios. The first part of the event, beginning at 0900pst, will involve the exchange of messages between field units and a base unit. Most stations will be in southern California. Frequencies will be between 3870 and 3885kc.

o The second half of the event will begin at 1100pst. K6KPH will take on the role of a home station in a clandestine service and will run a wheel that mimics the long gone State Department home station KKN50 on 7050kc. K6KPH will listen for calls from agents on the California agent radio frequency of 7141kc (and will also monitor 7050kc).

Once contact is made K6KPH will transmit messages on hand to agent station. These will be plain text but in 5 letter groups to mimic a coded message. We will also be QRV for incoming reports from the agent stations.

Calls to listen for include WB6HQK, N6PY, K6LQI, W7QHO and of course K6KPH.

Sorry for the late notice but I hope you can participate or just listen in. Reception reports would be appreciated.

VY 73,

RD

Perhaps some of you audio-oriented types might have the specs for an older ADC 308G audio transformer lurking somewhere in your files.
If so, I'd appreciate the specs. Looks like maybe mic input.

Digging through stuff I found an RCA manual for AVT-112, AVR-20A, =
AVA-126A, and AVA-120. That covers RCA transmitter, receiver, pwr =
supply, and antenna dated April 1943. (Signal Corps contracts are dated =
15 April '43 and 30 June '43).=20

I think somebody on one of the BA or Mil lists asked for this recently.

Also..found TM 11-250 for SCR-288 and 'Working Instructions part1' for =
wireless set 19 MK I/MK II/MK III. Both are small pocket sized manuals.
